### Information about this drug

---

Faslodex® (fulvestrant)

In clinical trials Faslodex® has been found to be no more effective than tamoxifen or anastrozole (Arimidex®) in the treatment of advanced breast cancer in postmenopausal women.

You can make an expedited request by indicating this at the top of the attached form. If you request an expedited review, and sign the attached form, you certify that applying the 72 hour standard review time frame may seriously jeopardize the life or health of the member or the member's ability to regain maximum function.

**Information on the attached form is protected health information and subject to all privacy and security regulations under HIPAA.**
