Information about this drug

Tykerb® (lapatinib)

Tykerb® is restricted to patients with metastatic or advance breast cancer who have progressed despite previous chemotherapy trials. Tykerb® should be used cautiously in patients with liver function impairment and/or QT interval prolongation. Tykerb® dose adjustments are required in patients receiving concomitant CYP3A4 enzyme inducers or inhibitors.

You can make an expedited request by indicating this at the top of the attached form. If you request an expedited review, and sign the attached form, you certify that applying the 72 hour standard review time frame may seriously jeopardize the life or health of the member or the member's ability to regain maximum function.

Information on the attached form is protected health information and subject to all privacy and security regulations under HIPAA.
